

**AiCuris** was founded in 2006 and is specialised on infectious diseases. The company's activities comprise discovery, research and development of novel antiviral and antibacterial agents in the indications HIV, Herpes, Hepatitis B and C, Human Cytomegalovirus and (multi)resistant bacterial infections treated in the hospital. The highly innovative pipeline of AiCuris addresses specialist markets and severe, potentially life threatening infections with high medical need.

Currently AiCuris is offering the position of:

## **Medical Director (m/f)**

The role of this individual is to provide medical input and scientific concepts for AiCuris projects. Furthermore, he/she will successfully design, conduct and report international clinical trials in the respective subject area in collaboration with the AiCuris project team, external consultants, service providers, and ethical / regulatory bodies.

### **Responsibilities:**

- Be responsible for conceiving the clinical development program for drugs and projects in development
- Be a medical expert/advisor/reviewer regarding the protocol, the disease, the trial data, and the drug
- Be responsible for conceiving scientific concepts, medical support of the clinical conduct, supervision of clinical trial management, data evaluation, and document writing for trials in close collaboration with colleagues and CROs
- Take over responsibility for medical and clinical questions in the project teams and the integration of these aspects in e.g. development plan, protocols, reports, IB, IMPD, and IND
- Represent medical and scientific aspects at meetings, agencies, and on congresses

### **Skills and Qualifications**

- MD degree
- At least five years of experience in the field of clinical trials; ideally in phase 2 and 3 of the clinical development process
- Expertise in anti-infectives is a real advantage
- Work experience at a hospital categorized for the maximal health care (e.g. University clinic esp. at internal medicine) would be beneficial
- Ability to work in team in house as well as with CROs, experts and opinion leaders
- Good organisational and communication skills, capable of setting priorities and to manage high workload
- Positive & constructive attitude, people management competencies and trustworthy
- Fluent in business English; German skills would be beneficial

We offer an exciting and challenging job in an expanding and innovative company with an excellent R&D portfolio and a highly motivated team exhibiting many years of Big Pharma experience.

### **How to apply**

To apply, please submit your full application inclusive your curriculum vitae and salary requirements exclusively via email in electronic form (**one** pdf-file).
